LUCENT Content

Front Page (Home)

- Hero: Proactive. AI-Driven. Comprehensive. LUCENT is a GenAI-powered external threat intelligence platform that gives Malaysian enterprises and public agencies real-time visibility into threats across the Surface, Deep, and Dark Web. We help you see attacks before they strike, and understand what happened after—down to the who, where, when, and how. Consolidate CTI, DRP, and EASM into one system that prioritizes what matters and guides swift mitigation. Know more, prioritize better, act faster.
- Why LUCENT LUCENT delivers context-driven, Malaysia-ready threat intelligence aligned to your assets, industry, and risk profile. Multi-layer coverage, GenAI scoring, and MITRE ATT&CK mapping reduce noise and spotlight real risk. Seamless integrations, alerting, and mitigation workflows accelerate decisions and response. Whether you're scaling a SOC or just starting, LUCENT fits your operating model from day one.
- What You Get Gain unified visibility into exposed assets, credential leaks, phishing infrastructure, and vulnerabilities—correlated with active threat actor activity. Access raw data, enriched IOCs, and AI-generated feeds with STIX/TAXII for downstream tools. Leverage automated recommendations and process management to track closure. Empower executives with dashboards and analysts with deep-dive investigations.
- Built for Malaysia's Critical Sectors Support for government, security and law enforcement, financial institutions, telecommunications, critical infrastructure, and enterprises across sectors. Local teams need early warnings, clear risk prioritization, and audit-friendly reporting—LUCENT delivers all three. Tailored monitoring plans reflect your Malaysian footprint and business priorities. Mature capabilities scale from single team deployments to MSSP multi-tenant delivery.
- Outcomes That Matter Identify threats 3× faster and streamline mitigation to as few as four clicks. Reduce fraud by detecting compromised cards and credentials before abuse. Strengthen operational resilience with early warnings and actionable next steps. Build trust with transparent intelligence, audit trails, and consistent reporting.
- Call to Action See how LUCENT protects Malaysian organizations. Request a live demo and baseline assessment.

Legal and Notes

Summary

- LUCENT unifies CTI, DRP, and EASM with GenAI for proactive, external threat intelligence.
- Modules cover exposed assets, credentials, phishing, vulnerabilities, fraud, actors, IOCs, and ad-hoc investigations.
- Dashboards, alerts, recommendations, and integrations turn intelligence into action with audit-ready workflows.
- Built to protect Malaysian public sector and enterprises with rapid deployment and measurable outcomes.

Platform

- Platform Overview LUCENT unifies Cyber Threat Intelligence (CTI), Digital Risk Protection (DRP), and External Attack Surface Management (EASM) into one platform. It continuously collects across the Surface, Deep, and Dark Web, closed forums, social platforms, and messaging channels. GenAI classifies, scores, and prioritizes findings to cut false positives. The result: high-confidence, action-ready intelligence.
- Multi-Layer Visibility Monitor domain mentions, data leaks, exploit chatter, and access sales across underground networks and social media. Track threat actor activity, malware campaigns, and fraud marketplaces relevant to your organization. Discover exposed assets, weak controls, and expired certificates that attackers can see. Maintain continuous coverage with automated collection and curated templates.
- AI-Powered Prioritization A GenAI engine filters, classifies, and risk-scores findings according to your context and industry. Results map to MITRE ATT&CK tactics and STIX-based threat vectors for fast comprehension. Analysts can adjust scores as understanding evolves, ensuring adaptive prioritization. Daily AI cyber feeds enrich situational awareness with current incidents, TTPs, malware, and exploited CVEs.
- Dashboards and Widgets Executive and analyst dashboards highlight trends, urgent incidents, and relevant actors. Widgets surface ransomware waves, active malware families, frequently exploited vulnerabilities, and sector-specific risks. Custom query widgets let teams track topics and sources that matter most. Everything is designed for clarity, speed, and shared understanding.
- Alerts and Early Warnings A configurable Alert Center provides early notifications for compromised credentials, exposed assets, phishing, fraud, and additional scenarios. Tune severity, rules, and frequency to your operating rhythms. Deliver alerts to email and export to downstream systems to align with SOC workflows. Move from awareness to action within minutes.
- Full Data Access for Investigations Review full raw data and metadata, including images with OCR-extracted text for search. Use entity extraction to quickly pivot across actors, domains, IPs, CVEs, and malware. Slice large datasets with intuitive filters and facets to isolate what matters. Keep investigations evidence-based and reproducible.

- Actionable Mitigation Use a preconfigured recommendation library for common threat types including data leakage, malware, brand abuse, and fraud. Assign recommendations, set due dates, and track completion to ensure closure. Turn intelligence into measurable outcomes with structured, auditable workflows. Maintain a complete trail for post-incident reviews and compliance.
- Integrations and APIs Export IOCs in CSV or via TAXII and integrate with SIEM, SOAR, and big data systems. Use REST APIs to automate flows and enrich existing tools. Push early warnings to email for business stakeholders. Keep your stack and make it smarter with LUCENT as the intelligence backbone.
- Deployment and Architecture Cloud-native and multi-tenant for scale, rapid onboarding, and efficient operations. Typical configuration takes minutes, enabling value in days—not months. Operate securely across multiple customer environments with data isolation. Designed for both enterprise SOCs and MSSPs.

Modules

- External Attack Surface Management (EASM) Continuously discover and score external-facing assets to expose open ports, vulnerable services, and expired SSL. Track assets you define and those auto-discovered by LUCENT. Identify access and remote access credentials tied to your estate. Prioritize remediation with intelligence-driven scoring.
- Compromised Credentials Detect leaked emails and passwords across breaches, forums, markets, messaging apps, and info-stealer logs. Flag high-risk exposures for VIPs and critical roles. Triage in a unified dashboard with powerful filtering and export options. Stop account takeover before it begins.
- Phishing Intelligence Find impersonating domains, subdomain abuse, and suspicious SSL patterns to identify phishing kits early. Monitor permutations and lookalike domains at scale. Investigate infrastructure insights to accelerate takedown. Protect customers and brand before phishing goes live.
- Vulnerability Intelligence Monitor vulnerabilities tied to your tech stack—including trending CVEs and exploit trading. Prioritize patching using external exploitation chatter and sector relevance. See zero-day signals where threat actors market fresh exploits. Focus finite resources on the most dangerous gaps.
- Credit Card Fraud Mitigation Track underground trading of stolen cards linked to your institution. Identify patterns to isolate sources and contain fraud quickly. Use early alerts to cancel cards before monetization. Reduce losses and bolster customer trust.
- Threat Actor Profiling Generate dynamic profiles of actors across forums, social networks, and messaging channels. Review activity trends, interests, and extracted entities in Overview and Activities tabs. Anticipate TTPs and adjust defenses accordingly. Keep watch on actors focused on your industry.
- Explore (Ad-Hoc Intelligence) Run targeted queries for actors, domains, IPs, CVEs, exploits, and malware. Add results to your account data lake for correlation and enrichment. Export and share with stakeholders or downstream tools. Answer new questions in minutes, not days.
- IOC Management Centralize IOCs from commercial and proprietary feeds with rich context. Enrich with actor links, malware families, geographies, and confidence. Export via CSV or TAXII to EDR, firewalls, SIEM, and XDR. Turn intelligence into automated controls across your stack.

Solutions by Security Challenge (Malaysia)

1. **Business Continuity & Resilience**

- Example of the challenge A ransomware group targets your core systems, forcing branch and online operations to halt and risking service-level breaches.
- What LUCENT can do for you Monitor ransomware ecosystems and leak sites for early warnings tied to your brand and tech stack. Prioritize exposed internet-facing services through EASM and vulnerability intelligence. Provide GenAI-scored alerts, ATT&CK mapping, and recommended actions to reduce downtime. Feed IOCs to SIEM/SOAR, WAF, and EDR/XDR for rapid blocking. Deliver executive-ready dashboards that show risk, actions, and recovery progress.

2. **Enterprise Regulatory Compliance & Audit Readiness**

- Example of the challenge Auditors request proof of proactive external monitoring, incident documentation, and timely mitigation actions for PDPA-aligned governance.
- What LUCENT can do for you Maintain audit-friendly evidence with raw data, metadata, and case histories. Track decisions, due dates, and closure using structured workflows and recommendations. Provide executive and analyst dashboards to demonstrate continuous improvement. Export IOCs and reports to support oversight and governance reviews. Align routine reporting with regulator expectations for transparency and control.

3. **Ransomware Preparedness & Leak Site Monitoring**

- Example of the challenge A threat actor claims they will publish a Malaysian hospital's data on leak sites to pressure for payment.
- What LUCENT can do for you Continuously track actor chatter, leak sites, and access sales relevant to your organization. Alert on imminent releases and correlated infrastructure to block and contain. Map findings to ATT&CK and provide playbook-ready recommendations. Share IOCs to downstream tools and coordinate takedown steps. Provide evidence bundles for legal and incident communications.

4. **Dark Web Exposure & Access Broker Sales**

- Example of the challenge An access broker lists VPN or RDP access to a logistics company's environment with price and proof.

- What LUCENT can do for you Detect and alert on access sales tied to your domains, brands, or IPs. Correlate with EASM to identify exposed services used for initial access. Prioritize remediation steps and push IOCs to controls for immediate blocking. Preserve raw posts and screenshots as verifiable evidence. Provide watchlists to track repeat sellers and linked actor networks.

5. **Phishing & Brand Impersonation**

- Example of the challenge A look-alike domain and fake app impersonate a Malaysian eWallet brand to harvest credentials and card data.
- What LUCENT can do for you Identify domain permutations, suspicious SSL patterns, and phishing kit infrastructure early. Enable takedown guidance and provide exportable IOCs for mail, web, and endpoint defenses. Track social media and messaging channels for brand and app abuse. Prioritize threats with GenAI scoring to fast-track response. Deliver trend insights to steer awareness and customer protection campaigns.

6. **Compromised Credentials & Account Takeover**

- Example of the challenge Administrator credentials appear in info-stealer logs, enabling lateral movement and data exfiltration.
- What LUCENT can do for you Continuously monitor breaches, stealer logs, and forums for exposed emails and passwords. Flag VIP and privileged accounts to accelerate resets and MFA checks. Consolidate findings in a dedicated dashboard with filters and export options. Feed IOCs into SIEM/SOAR to automate containment. Track closure to ensure no exposure remains unattended.

7. **External Attack Surface & Shadow IT**

- Example of the challenge An untracked cloud subdomain with an open admin panel is indexed and probed by scanners.
- What LUCENT can do for you Use EASM to discover unknown assets, exposed services, and expired certificates. Score exposures with external exploitation signals to prioritize remediation. Provide recommended actions and assign tasks with due dates to owners. Maintain visibility across subsidiaries and environments with role-based access. Validate fixes through continuous monitoring.

8. **Supply Chain & Third-Party Risk**

- Example of the challenge A vendor breach exposes your data and is used in spear-phishing against your staff and customers.

- What LUCENT can do for you Monitor dark web mentions for your brand and key suppliers to detect cascading risk. Correlate related domains, IPs, and actor activity for early warnings. Provide takedown guidance and share IOCs to protect shared customer touchpoints. Track cases to closure with auditable steps and evidence. Produce concise reports for vendor management and stakeholder updates.

9. Financial Crime & Fraud Prevention

- Example of the challenge BIN-specific card data is traded on underground markets, followed by OTP-bypass phishing campaigns.
- What LUCENT can do for you Track underground card trading tied to your brand and BINs to trigger preemptive actions. Detect phishing kits and infrastructure supporting fraud and ATO. Export IOCs to payment fraud tools, WAFs, and email security controls. Prioritize customer outreach for impacted segments. Measure downstream reduction in fraud and chargebacks.

10. Data Leakage & IP Protection

- Example of the challenge Source code fragments and confidential documents appear on paste sites and closed forums.
- What LUCENT can do for you Monitor pastebins, forums, and messaging channels for sensitive keywords and document fingerprints. Use OCR to extract text from images and screenshots for searchability. Alert and guide takedown requests with packaged evidence. Track recommendations and tasks to ensure complete containment. Feed detections to DLP and SOC tooling via APIs.

11. Executive & VIP Protection

- Example of the challenge Doxxing and spear-phishing campaigns target your CEO and finance leaders to trigger fraudulent approvals.
- What LUCENT can do for you Create VIP watchlists for credential leaks, impersonation, and targeted phishing kits. Monitor social and underground chatter naming executives and brands. Provide IOCs and takedown actions to email and identity security tools. Score severity to concentrate resources on high-impact threats. Produce leadership-ready summaries for quick decisions.

12. DDoS & Service Disruption Early Warning

- Example of the challenge An actor group publicly threatens a DDoS campaign against your online banking portal during a peak period.

- What LUCENT can do for you Monitor actor channels for DDoS claims, botnet rentals, and attack windows. Alert operations with IOCs and infrastructure fingerprints to pre-stage controls. Provide recommended mitigation steps for WAF/CDN and upstream providers. Track incident readiness and outcomes in dashboards. Preserve evidence for post-event analysis and communications.

13. Vulnerability Prioritization & Patch Intelligence

- Example of the challenge A new CVE with public exploit appears; your internet-facing systems run the affected component.
- What LUCENT can do for you Correlate vulnerabilities in your stack with active exploitation chatter to prioritize patching. Map risks to specific assets discovered via EASM. Provide concise mitigation recommendations and task ownership. Export relevant IOCs and threat artifacts to SOC tools. Use trend widgets to plan patch waves and measure risk reduction.

14. Incident Investigation & Evidence Development

- Example of the challenge After a breach, investigators need verified timelines, original posts, and linked entities to understand the “how.”
- What LUCENT can do for you Provide raw posts, metadata, and OCR text for rigorous, reproducible analysis. Extract entities to pivot across actors, domains, IPs, CVEs, and malware. Group artifacts into cases with annotations and decision logs. Export IOCs and reports to partner systems and legal teams. Align findings with ATT&CK to inform defensive improvements.

15. Misinformation/Disinformation & Brand Reputation

- Example of the challenge False narratives about your services spread across social channels, triggering customer churn and regulatory scrutiny.
- What LUCENT can do for you Track cross-platform narratives, coordinated posts, and amplification patterns. Identify origin points and related malicious infrastructure. Provide evidence for takedowns and stakeholder communications. Alert leadership with concise risk summaries and recommended responses. Monitor post-mitigation to validate recovery.

16. Insider Access Sales & Employee Impersonation

- Example of the challenge An underground forum advertises “insider access” to a Malaysian enterprise, with alleged screenshots and price.

- What LUCENT can do for you Detect insider access offers tied to your brand, domains, or systems. Correlate with credential leaks and EASM findings to identify entry paths. Alert SOC and HR security partners with evidence bundles. Share IOCs to block suspected infrastructure and accounts. Track takedown and internal remediation tasks to closure.

17. Counterfeit & Marketplace Abuse

- Example of the challenge Counterfeit listings and fake vendor pages use your brand assets, diverting sales and eroding trust.
- What LUCENT can do for you Discover fraudulent sites, listings, and app impersonations across platforms. Package evidence and provide takedown guidance to hosts and marketplaces. Share IOCs with ad networks, CDNs, and security gateways. Prioritize high-impact cases using GenAI scoring. Report improvements with measurable reductions in abuse.

18. Drug Trafficking & Illicit Trade Intelligence (for LEA/Regulatory)

- Example of the challenge Telegram channels advertise controlled substances to Malaysian buyers with delivery instructions.
- What LUCENT can do for you Monitor closed forums and messaging channels with targeted queries and watchlists. Use OCR to extract text from images and menus for search and correlation. Build actor profiles, transaction patterns, and linked infrastructure. Export structured evidence for inter-agency workflows and actions. Maintain continuous surveillance to track shifts and re-emergence.

19. Wildlife Poaching & Environmental Crime (for LEA/NGO)

- Example of the challenge Social posts coordinate illegal wildlife sales, using code words, images, and burner accounts.
- What LUCENT can do for you Track species keywords, price codes, and image patterns across social and marketplaces. Extract entities and link accounts, wallets, and domains. Provide case files with raw evidence and timelines. Alert on rebranded profiles and repeated sellers. Share intelligence securely with partner organizations.

20. Business Email Compromise (BEC) & Procurement Fraud

- Example of the challenge Look-alike domains and thread hijacking target your procurement cycle to reroute payments.

- What LUCENT can do for you Detect look-alike domains and impersonation infrastructure before campaigns launch. Provide IOCs to mail security, WAF, and endpoint controls for fast blocking. Package takedown requests with evidence to reduce dwell time. Track supplier-related abuse and alert finance leaders. Measure incident reduction via dashboards and closure metrics.

21. Crypto & Web3 Risk (Exchanges, Fintech, Retail)

- Example of the challenge Fraudsters spin up fake token sales and phishing sites to drain wallets from Malaysian users.
- What LUCENT can do for you Monitor domains, social promotions, and underground forums for crypto-themed scams. Identify kit reuse, hosting patterns, and actor overlaps. Share IOCs with browser, wallet, and anti-phishing controls. Provide rapid takedown guidance and stakeholder alerts. Track campaign evolution to prevent re-use.

22. Physical Security Threat Signals & Event Safety

- Example of the challenge Online threats are posted against a branch location or corporate event, including doxxing and calls for disruption.
- What LUCENT can do for you Detect cross-platform threats and escalation patterns tied to your venues and dates. Prioritize severity with GenAI scoring and provide concise threat briefs. Share evidence with authorities and internal protective teams. Maintain a live watchlist for names, terms, and locations. Document outcomes for debriefs and policy updates.

Solutions by Industry

Industry Solutions (Malaysia)

Financial Services (Banks, Islamic banks, eWallets)

- Pain Points
    - Card and credential data appear on underground markets before legacy controls detect fraud.
    - Phishing, look-alike domains, and brand abuse drive account takeover and reputational loss.
    - Exposed internet-facing systems and misconfigurations create high-value entry points.
    - Regulators expect proactive, audit-ready external threat intelligence and faster incident reporting.
- What LUCENT can do for you
    - Track credit-card trafficking, breach dumps, and info-stealer logs to trigger preemptive card blocks and forced resets.
    - Detect phishing kits and impersonating domains early; provide takedown guidance and exportable IOCs for blocking.
    - Use EASM to discover exposed assets, open ports, and expired SSL; prioritize by active exploitation chatter.
    - Apply GenAI scoring and MITRE ATT&CK mapping for rapid triage with executive/analyst dashboards and PDPA-friendly reporting.
    - Integrate via STIX/TAXII and REST APIs into SIEM/SOAR to automate investigation, resets, and network blocks.

Telecommunications (Fixed, Mobile, ISPs)

- Pain Points
    - Large, distributed attack surfaces with legacy systems, shadow IT, and frequent credential leaks.
    - Brand impersonation, SIM-swap fraud vectors, and customer phishing campaigns at scale.

    - Need to operate at service-provider pace while meeting MCMC expectations and SLA commitments.
- What LUCENT can do for you
    - Run multi-tenant monitoring and dashboards for lines of business and enterprise customers (MSSP-ready).
    - Detect impersonation domains, fake apps, and phishing infrastructure; enable takedowns and share IOCs with NOC/SOC.
    - Correlate botnet/C2 chatter, DDoS claims, and exploitation signals to prioritize protective actions.
    - Use EASM to continuously uncover exposed services and weak cert hygiene across vast IP ranges.
    - Automate reporting and alerts to business stakeholders while feeding controls via TAXII/CSV/API.

Government & Public Sector

- Pain Points
    - Targeted ransomware, data leakage of citizen records, and disinformation campaigns.
    - Alert fatigue and limited analyst capacity hinder timely mitigation.
    - High scrutiny for transparency, resilience, and regulator-ready documentation.
- What LUCENT can do for you
    - Monitor surface/deep/dark sources and closed communities for early breach and actor activity against agencies.
    - Leverage GenAI risk scoring to cut noise and elevate real threats with MITRE-mapped context.
    - Protect brands and leaders with DRP: domain/IP spoofing, social media abuse, and app impersonation detection.
    - Provide raw data access, evidence trails, and audit-friendly reporting to support oversight and compliance.

    - Integrate IOCs into existing stacks to harden defenses without rip-and-replace.

Law Enforcement & Security Agencies

- Pain Points
    - Need visibility into restricted forums and encrypted channels to track actors and campaigns.
    - Case work requires verifiable sources, timelines, and exportable evidence.
    - Rapid pivoting across entities (actors, wallets, domains, IPs) is time-critical.
- What LUCENT can do for you
    - Profile threat actors with activity timelines, interests, and entities; watch lists for groups targeting Malaysia.
    - Provide raw posts, metadata, and OCR-extracted image text for searchable, citable evidence.
    - Use Explore for ad-hoc queries across actors, CVEs, malware, and infrastructure; group into cases with annotations.
    - Export IOCs and reports to partner systems and share across inter-agency workflows securely.

Healthcare (Hospitals, Clinics, HealthTech)

- Pain Points
    - Ransomware targeting PHI, legacy system exposure, and third-party supplier risk.
    - Staff phishing and credential theft enable lateral movement and service disruption.
    - Compliance and patient trust demand fast, evidence-based response.
- What LUCENT can do for you
    - Monitor ransomware leak sites and markets for hospital mentions, stolen records, and initial-access sales.
    - Detect credential leaks tied to clinicians, admins, and vendors; auto-prioritize VIP exposure.

    - Use EASM to uncover exposed services, misconfigurations, and weak SSL on internet-facing systems.
    - Identify phishing kits and fake patient portals; guide takedown and push IOCs to email and web gateways.
    - Provide concise dashboards for leadership with task tracking to closure.

Logistics & Supply Chain

- Pain Points
    - Business email compromise, spoofed domains, and shipment fraud targeting partners and customers.
    - Supplier exposure cascades into your environment; credentials and API keys appear in dumps.
    - Operational uptime is sensitive to targeted exploitation and ransomware.
- What LUCENT can do for you
    - Detect brand impersonation and look-alike domains across global routes and partner ecosystems.
    - Monitor supplier mentions and data leaks in underground channels to flag third-party risk early.
    - Surface credential and token leaks tied to transport systems and portals; trigger resets before abuse.
    - Apply EASM and vulnerability intelligence to prioritize fixes on internet-exposed OT/IoT and cloud endpoints.
    - Automate alerts and export IOCs to email security, WAF, and endpoint tools.

Energy & Utilities (Power, Water, ICT Critical Infrastructure)

- Pain Points
    - Nation-state and criminal targeting of public services and mixed IT/OT estates.
    - Limited visibility into external reconnaissance, exploit trading, and access sales.
    - High cost of downtime and regulatory oversight on resilience.

- What LUCENT can do for you
    - Track actor discussions, access offers, and malware targeting critical infrastructure sectors.
    - Use EASM to find exposed interfaces, remote access credentials, and expired certs visible to attackers.
    - Prioritize vulnerabilities by active exploitation chatter, not just CVSS, to focus scarce patch windows.
    - Feed IOCs and takedown actions into SOC runbooks; measure closure in dashboards.

Manufacturing (Discrete, Process, High-Tech)

- Pain Points
    - Ransomware, IP theft, and supplier compromise leading to production disruption.
    - Legacy assets and exposed endpoints increase the attack surface.
    - Brand abuse and fake vendor sites mislead partners and customers.
- What LUCENT can do for you
    - Monitor dark-web forums for data auctions and access sales tied to plants and brands.
    - Detect impersonation domains and fraudulent marketplaces; enable swift takedown.
    - Use EASM to discover exposed services across plants and subsidiaries; score by exploitability.
    - Correlate actor TTPs and malware families to prioritize controls; export IOCs to EDR/XDR.

Retail & eCommerce

- Pain Points
    - Skimmer malware, credential stuffing, and carding forums cause revenue and trust loss.
    - Seasonal phishing spikes and fake apps target shoppers and staff.

    - Fast-moving fraud outpaces manual investigation.
- What LUCENT can do for you
    - Use credit-card fraud mitigation to track stolen card sales tied to your BINs and brands.
    - Detect phishing kits, fake stores, and app impersonation early; share IOCs with WAF, CDN, and mail filters.
    - Monitor credential leaks from customers and staff; drive proactive password resets and MFA prompts.
    - Provide trend widgets on active malware and exploited CVEs to steer sprints and patch waves.

Education & Research (Universities, Colleges)

- Pain Points
    - Open networks increase credential theft and lateral movement risk.
    - Phishing against students and faculty, and theft of research data/IP.
    - Limited analyst capacity to investigate across diverse sub-domains and labs.
- What LUCENT can do for you
    - Monitor breaches and info-stealer logs for edu accounts at scale; fast filtering for departments and VIPs.
    - Detect look-alike portals and social impersonations; provide takedown guidance and IOCs.
    - Use EASM to map exposed services and lab endpoints; prioritize by exploitation signals.
    - Deliver executive/analyst dashboards with task tracking for deans, IT, and research leads.

Insurance

- Pain Points
    - Large volumes of PII/PHI attract data brokers and fraud rings.
    - Brand impersonation and policyholder phishing drive claims fraud and ATO.

    - Compliance pressure for proactive, documented risk management.
- What LUCENT can do for you
    - Monitor dark-web markets and leak sites for policyholder and claims data, with rapid severity scoring.
    - Identify phishing kits and fake agent sites; supply IOCs and takedown actions to protect customers.
    - Detect staff and partner credential exposure; enforce resets and watchlists for high-risk roles.
    - Integrate feeds into fraud analytics and SIEM/SOAR to accelerate case investigation.

Other industries

- Pain Points
    - Limited security headcount, fragmented tools, and shadow IT expand the external attack surface.
    - Brand impersonation, fraud schemes, and credential leaks hurt trust and revenue.
    - Low external visibility causes slow triage, while compliance and audit demands keep rising.
    - Campaign-based threats spike around seasons, events, and product launches.
    - Teams need quick wins without complex, lengthy deployments.
- What LUCENT can do for you
    - Provide unified external threat intelligence across Surface, Deep, Dark Web, social platforms, and messaging channels with continuous collection.
    - Apply GenAI risk scoring, deduplication, and MITRE ATT&CK mapping to cut noise and prioritize by business impact.
    - Deliver DRP for brand and VIP protection: detect phishing kits, look-alike domains, fake apps, and social media abuse with takedown guidance.
    - Run EASM to discover assets, exposed services, expired certificates, and misconfigurations, prioritized by external exploitation signals.

- Detect compromised credentials and fraud indicators from breach dumps, stealer logs, and markets, with VIP watchlists and automated reset workflows.
- Provide vulnerability and exploit intelligence on trending CVEs, exploit trading, and zero-day signals to steer patching.
- Profile threat actors with activity timelines and TTPs; maintain watchlists and targeted alerts.
- Power investigations with raw data access, metadata, OCR for images, entity extraction, and case management with auditable evidence.
- Orchestrate early warnings and guided remediation using a recommendation library, task ownership, due dates, and closure tracking.
- Integrate via STIX/TAXII, REST APIs, and CSV to SIEM, SOAR, EDR/XDR, WAF, and email gateways; send alerts to business stakeholders.
- Offer executive and analyst dashboards with trend widgets and shareable, audit-friendly reports aligned to PDPA expectations.
- Enable rapid, cloud-native onboarding with role-based access and multi-tenant operations for groups and MSSPs.
- Track measurable KPIs and service levels to demonstrate continuous improvement and risk reduction.

Getting Started

- Request a Malaysia-focused baseline assessment, configure a monitoring plan, connect your existing stack, and see results within days.

Features

Digital Risk Protection (DRP)

- DRP Overview DRP anticipates external risks to brand, people, and data across open and hidden channels. It combines persistent surveillance, early threat identification, and guided response. LUCENT operationalizes DRP with integrated CTI and EASM for end-to-end coverage. Reduce surprise and improve resilience.
- DRP Implementation Framework Phase 1: Collect signals across web, social, and underground sources tied to your brand and assets. Phase 2: Assess and classify threats by severity and impact. Phase 3: Communicate concise, actionable reports to decision-makers. Phase 4: Maintain continuous surveillance with iterative improvements.
- Strategic DRP Applications Monitor ransomware ecosystems and leak sites for early indicators and IOCs. Detect domain/IP spoofing, fake apps, and brand abuse for quick takedowns. Track credential harvesting, data auctions, and supply chain exposure. Protect executives and high-risk roles with targeted monitoring.
- DRP with LUCENT Receive GenAI-evaluated severity to focus on urgent actions. Use built-in recommendations and process tracking to ensure closure. Combine DRP outcomes with EASM and CTI to strengthen defenses. Turn digital risk insights into measurable, cross-team improvements.

For MSSPs and Partners

- MSSP Value Offer external threat intelligence, DRP, and EASM services from a single platform. Serve many customers efficiently with a multi-tenant architecture and role-based access. Automate reporting for CISOs and SOC leads to scale communication. Differentiate with rapid deployment and customized monitoring plans.
- Operations and Roles Use MSSP Admin/Analyst roles to manage portfolios and investigations. Provide customers with view-only access to executive dashboards. Central dashboards summarize portfolio risk and trending threats. Maintain data isolation while operating at scale.
- Commercial Model and Efficiency Adopt a pay-for-what-you-deploy model to reduce upfront risk. One analyst can efficiently support up to ten customers through automation. Typical annual customer pricing ranges allow sustainable growth. Expand service lines with upsell paths tied to advanced modules and reports.

Technology and AI

- GenAI Threat Intelligence GenAI filters large data volumes, kills false positives, and highlights relevant risks. It assigns threat levels, classifies by vector, and maps to ATT&CK. Daily AI cyber feeds cover global incidents, TTPs, malware, and exploited CVEs. Analysts get concise, contextual summaries ready for action.
- Facing AI-Enhanced Adversaries Attackers increasingly use AI for ransomware, social engineering, deepfakes, and exploit creation. LUCENT counters with predictive analytics, behavior deviation detection, and rapid classification. Stay informed with intelligence on actor TTPs and evolving tradecraft. Protect teams with evidence-backed, explainable insights.
- Accuracy and Coverage GenAI-enhanced identification delivers high-accuracy findings and fewer false alarms. Coverage spans restricted underground communities, not just public sources. Corroboration with partner feeds improves confidence. Intelligence translates into controls through IOC export and API integrations.

Integrations and Architecture

- Open Ecosystem Use STIX/TAXII and REST APIs to enrich SIEM, SOAR, EDR, and XDR. Export CSVs for bespoke analytics and reporting. Send early warnings to email for fast stakeholder awareness. Keep your tools—LUCENT makes them smarter.
- Cloud-Native, Multi-Tenant Deploy quickly with minimal setup to realize value fast. Operate secure, isolated accounts within one operational pane. Scale customers, teams, and data sources without complexity. Designed for enterprise SOCs and MSSPs in Malaysia.

SOC Workflows

- Investigation and Evidence Access raw posts, images with OCR text, and full metadata context. Use entity extraction and facets to pivot and narrow quickly. Group findings into cases and add investigator insights. Build defensible narratives grounded in verifiable sources.
- Alerting and Triage Receive pre-defined alerts for exposed assets, compromised credentials, phishing, and more. Tune rules and severity to match your playbooks. Convert alerts into tasks with due dates and owners. Measure throughput and closure with dashboard visibility.

- Mitigation and Follow-Through Apply recommended actions tailored to scenario types. Track completion across teams and incidents for accountability. Export IOCs to block infrastructure and detect recurrence. Learn from each incident to harden controls over time.

Getting Started (Malaysia)

- Rapid Onboarding Begin with a baseline assessment of current exposures and risks. Configure monitoring plans with curated templates and auto-discovered assets. Connect downstream tools for end-to-end workflows. See results in days with minimal disruption.
- Governance and Reporting Provide concise, executive-ready updates and analyst drill-downs. Maintain audit trails of detection, scoring, and actions taken. Align with internal policies and oversight expectations. Demonstrate continuous improvement and resilience.
- Request a Demo Experience LUCENT's GenAI-powered intelligence for your organization. Engage our team to tailor monitoring to your Malaysian footprint. Start proactive threat management with measurable outcomes.

Resources

- Overview Explore practical guides, technical briefs, and real-world case studies designed for Malaysian enterprises and public sector teams. All resources focus on external threat intelligence, DRP, and EASM, powered by GenAI. Use these to inform strategy, accelerate rollouts, and support audits. New content is added regularly.
- Whitepapers & Reports Deep dives on CTI, DRP, EASM, and GenAI for security leaders and SOC teams. Learn how to build proactive programs and measure outcomes. Each paper includes checklists and recommended next steps. Ideal for executive briefings and board updates.
- Case Studies See how telecoms, banks, and agencies improved detection and reduced risk with LUCENT. Get insights on deployment timelines, integrations, and operational wins. Each study highlights measurable outcomes and lessons learned. Use them to shape your rollout.
- Product Briefs & Datasheets Concise summaries of modules, features, and integration options. Understand coverage, data flows, and output formats (e.g., CSV, STIX/TAXII, APIs). Map capabilities to your use cases and maturity. Share with procurement and architecture teams.
- Webinars & Events (Malaysia) Join sessions on proactive threat intelligence, DRP frameworks, and AI-driven prioritization. Get demos, playbook tips, and Q&A with specialists. Content is tailored to Malaysian regulations and sector needs. On-demand recordings are available.
- Blog & Insights Stay current on threat trends, actor behavior, and ATT&CK-aligned defenses. Learn how to interpret dark web signals and prioritize actions. Posts include practical, SOC-ready takeaways. Shareable summaries help brief stakeholders quickly.
- Security Advisories Timely notes on exploited CVEs, actor campaigns, and fraud patterns. Each advisory includes relevance to Malaysia and recommended actions. Export IOCs for immediate controls. Subscribe for early alerts.
- Documentation & APIs Find developer docs for REST, CSV exports, and TAXII feeds. Learn how to integrate with SIEM, SOAR, EDR/XDR, WAF, and data platforms. Includes sample payloads and best practices. Support is available for onboarding.
- FAQs Answers to common questions on coverage, accuracy, deployment, and pricing models. Clarifies roles, dashboards, access controls, and MSSP use.

Includes security and privacy assurances aligned to PDPA. Updated as features evolve.

- Glossary Clear definitions of CTI, DRP, EASM, IOCs, TTPs, ATT&CK, and more. Align teams on shared terminology. Useful for training new analysts. Easy to reference during investigations.
- Get a Demo Request a live walkthrough and a Malaysia-focused baseline assessment. We tailor the session to your environment and sector. See early warnings, dashboards, and mitigation flows in action. Start fast, realize value in days.

About Us

- Who We Are We build GenAI-powered external threat intelligence for Malaysian enterprises and public sector organizations. Our platform, LUCENT, unifies CTI, DRP, and EASM in one place. We help teams see threats early, prioritize with confidence, and act decisively. Outcomes are measured, auditable, and repeatable.
- Our Mission Enable proactive cyber defense through clear, actionable intelligence. Reduce noise, accelerate decisions, and improve resilience across Malaysia's key sectors. Turn external signals into guided actions and measurable results. Make advanced threat intelligence accessible to every SOC.
- What We Build (LUCENT) LUCENT monitors Surface, Deep, and Dark Web sources, social platforms, and messaging channels. GenAI classifies, scores, and maps threats to ATT&CK for rapid triage. Dashboards, alerts, and recommendations drive consistent mitigation. Integrations connect intelligence to your existing tools.
- Why Malaysia Critical services and growing digital economies require early warning and faster response. Regulations and oversight demand transparency and audit-friendly reporting. We tailor monitoring plans, risk scoring, and reporting to Malaysian contexts. Local teams and partners ensure relevance and speed.
- How We Work We start with a baseline assessment and quick deployment. Templates, watchlists, and role-based access reduce time-to-value. We integrate with your stack to power established workflows. You keep your tools—LUCENT makes them smarter.
- Ethics & Compliance We follow lawful, authorized collection and responsible use of intelligence. PDPA-aligned privacy practices safeguard personal data. Evidence handling and audit trails support investigations and governance. We continuously review processes for integrity and accountability.
- Security by Design Data isolation, access controls, and least-privilege principles are core. We support secure multi-tenant operations for enterprises and MSSPs. Evidence and IOCs are exportable for validation and defense. Reliability and confidentiality guide every design choice.
- Partners & Ecosystem We work with channel, MSSP, and technology partners to scale value. Open standards (STIX/TAXII) and APIs enable broad interoperability. Joint offerings align with sector needs and Malaysian regulations. Together we deliver outcomes, not just tools.

- Corporate Information LUCENT is a solution from Odint Technologies Sdn Bhd. We operate with a commitment to Malaysian customers and stakeholders. Contact us for corporate and procurement information. Details are available upon request.

Contact Us

- Talk to Us Have a question, need a demo, or want a baseline assessment? Share your organization, sector, and objectives. We will route your request to the right specialist. Expect a response within one business day (MYT).
- Sales Enquiries Tell us about your use cases, integrations, and timelines. We can provide a tailored plan aligned to your SOC maturity. Procurement and legal documentation are available on request. We support pilots that show value quickly.
- Support Existing customers receive prioritized assistance and guidance. Share your ticket or case details for faster resolution. We can review dashboards, alerts, and integrations during sessions. Post-incident reviews help drive continuous improvement.
- Partnerships MSSPs and resellers can explore go-to-market and service models. Technology partners can integrate via REST or TAXII. We support joint solutions for Malaysian sectors. Reach out to align roadmaps and delivery.
- Media & Speaking Request briefings, quotes, or conference participation. We provide insights on external threat intelligence and GenAI in cybersecurity. Sessions can be tailored to sector audiences. Materials are available upon request.
- Security Disclosures Report suspected vulnerabilities or security concerns responsibly. We acknowledge receipt and coordinate remediation timelines. Please avoid public disclosure until a fix is available. We appreciate coordinated research and collaboration.
- Office Hours (MYT) We operate standard business hours in Malaysia. Critical incidents are handled with priority. Additional coverage can be arranged for events and seasons. Your account team can confirm SLAs.
- Data Protection Notice Information you submit is used to respond to your request and manage our relationship. We process it in line with PDPA requirements. Do not include sensitive personal data unless necessary. See our Privacy Policy for full details.

Careers

- Life at LUCENT Join a team focused on proactive cyber defense and measurable outcomes. Work with GenAI, CTI, DRP, and EASM to solve real problems. Collaborate across engineering, product, and intelligence teams. Grow in a supportive, mission-driven environment.
- What You'll Work On Build data pipelines, analytics, and APIs for external threat intelligence. Design intuitive dashboards and workflows for SOC teams. Research threat actors, TTPs, and emerging scams impacting Malaysia. Turn insights into faster, smarter defenses.
- Roles We Hire For We hire engineers, data scientists, threat analysts, product managers, and success leads. MSSP delivery, integrations, and solution consulting roles are common. Internships and graduate positions are available seasonally. We welcome applicants from diverse backgrounds.
- How We Hire Simple, structured steps: application review, skills assessment, and panel interviews. We evaluate problem-solving, collaboration, and practical impact. Interviews respect your time and provide clear expectations. We offer timely feedback and next steps.
- Growth & Learning Access mentorship, certifications, and on-the-job training. Learn ATT&CK, threat hunting, and GenAI-driven analysis. Rotate across projects to broaden skills. Build a career with meaningful outcomes.
- Benefits & Wellbeing We support flexible work arrangements when role-appropriate. Benefits are designed for health, family, and financial stability. Time-off policies support rest and recovery. Details are provided during the hiring process.
- Students & Graduates Start your career with real-world projects and guidance. Learn modern CTI, DRP, and EASM operations. Develop skills that matter to Malaysia's industries. Applications open periodically.
- Apply Now Send your CV and a short note on your interests and impact. Include links to code, research, or relevant work. We review every application carefully. We look forward to hearing from you.

Legal (Standard Clauses)

- Acceptance of Terms By accessing this site or using our services, you agree to these Terms of Use. If you do not agree, do not use the site or services. These terms apply to all visitors and users. Additional terms may apply to paid services.
- Changes to Terms We may update these terms from time to time. Changes take effect upon posting on this page. Continued use signifies acceptance of the updated terms. Material changes will be highlighted for clarity.
- Eligibility & Accounts You must have authority to bind your organization when creating an account. You are responsible for maintaining account security. Notify us immediately of unauthorized use. We may suspend accounts for suspected abuse.
- Use of the Site and Services Use the services only for lawful purposes and in accordance with applicable laws. Do not attempt to access non-public areas or disrupt the platform. Automated access must respect rate limits and API terms. We may monitor usage to ensure service integrity.
- Intellectual Property All content, software, and trademarks are owned by us or our licensors. You receive a limited, non-transferable right to use the services as permitted. Do not reverse engineer, copy, or redistribute except as allowed by law. Feedback may be used to improve services without obligation.
- Third-Party Services & Links The site may link to third-party websites or services. We are not responsible for their content or practices. Use them at your own risk. Their terms and policies apply.
- Confidentiality & Feedback Do not submit confidential information via public channels. If you share feedback, you grant us a right to use it. We handle customer data under separate agreements where applicable. Protect credentials and sensitive data at all times.
- Disclaimers Services are provided “as is” and “as available.” We disclaim warranties of merchantability, fitness, and non-infringement to the fullest extent permitted. We do not warrant uninterrupted, error-free operation. Your use is at your own risk.
- Limitation of Liability To the maximum extent permitted by law, we are not liable for indirect, incidental, or consequential damages. Our total liability is limited to fees paid for the affected service period. These limits apply even if we were advised of possible harm. Some jurisdictions may not allow certain limitations.

- Indemnification You agree to indemnify and hold us harmless from claims arising from your use or violation of these terms. This includes reasonable legal fees and costs. We will notify you of any claim subject to indemnity. You will cooperate in defense.
- Termination We may suspend or terminate access for breach or risk to the service. Upon termination, rights granted to you cease immediately. Certain sections survive termination, including IP, disclaimers, and liability limits. Data handling post-termination is governed by agreements and law.
- Governing Law & Dispute Resolution These terms are governed by the laws of Malaysia. Disputes will be resolved in the courts of Malaysia, unless otherwise agreed. We encourage good-faith efforts to resolve issues prior to litigation. Mandatory local law may still apply.
- Entire Agreement & Severability These terms constitute the entire agreement for site use. If any provision is unenforceable, the remainder remains effective. No waiver is implied by a failure to enforce. Headings are for convenience only.
- Contact Questions about these terms can be directed via the Contact page. We will respond within a reasonable period. Provide sufficient detail to help us assist you. Keep a copy of these terms for your records.

Privacy Policy (Standard Clauses)

- Who We Are and Scope This Privacy Policy explains how we handle personal data for our website and related services. It applies to visitors, prospects, customers, and job applicants. LUCENT is a solution from Odint Technologies Sdn Bhd. Additional terms may apply to signed customer agreements.
- Personal Data We Collect We collect data you provide, such as contact details, job applications, and support requests. We collect technical data like IP address, device details, and usage logs. We may receive data from partners and publicly available sources. Do not submit sensitive personal data unless requested and necessary.
- How We Use Personal Data We use data to provide and improve services, respond to requests, and operate our website. We personalize content, measure performance, and secure our systems. We communicate about features, events, and updates where permitted. We comply with legal obligations and protect our rights.
- Legal Bases (PDPA Malaysia) We process data with your consent, to perform a contract, or for our legitimate interests. Legitimate interests include service delivery, security, and business operations. We balance these interests with your rights and expectations. We honor PDPA requirements for transparency and choice.
- Cookies & Similar Technologies We use cookies to remember preferences, analyze usage, and improve experience. You can control cookies via your browser settings. Some features may not function without certain cookies. See our Cookie Notice if provided.
- Sharing & Disclosures We share data with service providers under confidentiality and security obligations. We may disclose data to comply with law or protect safety and rights. We share necessary data with partners to deliver integrations and services. We do not sell personal data.
- International Transfers Where data is transferred outside Malaysia, we apply appropriate safeguards. Contracts, technical measures, and due diligence protect your data. We ensure vendors meet comparable standards. Contact us for details on safeguards.
- Data Retention We retain data for as long as needed to fulfill purposes or comply with law. Retention periods vary by record type and context. We anonymize or

securely delete data when no longer required. You may request deletion where applicable.

- Security Measures We apply technical and organizational controls to protect data. Access is restricted based on role and necessity. We review security controls regularly. No system is entirely risk-free, but we work to reduce risk.
- Your Rights (Malaysia PDPA) You may request access, correction, or deletion of your personal data. You may object to certain processing or withdraw consent. We will verify identity before fulfilling requests. We will respond within a reasonable timeframe.
- Children's Privacy Our services are not directed to children. We do not knowingly collect data from minors without appropriate consent. If we learn of such collection, we will delete it promptly. Parents or guardians may contact us with concerns.
- Updates to this Policy We may update this Privacy Policy from time to time. Changes take effect upon posting. Material updates will be highlighted. Continued use signifies acceptance.
- How to Contact Us Use the Contact page for privacy-related requests or questions. Please state your request type and relevant details. We will respond within a reasonable period. You may also contact us through your account representative.
- Legal Notice © 2025 Odint Technologies Sdn Bhd. All rights reserved. Terms, policies, and features may change as services evolve. For the latest information, please check this site.
